Spring 2015 Workshops

All workshops last one hour and are offered twice: 2pm Tuesdays and 10am Wednesdays.

Making Maps Online
Meet two easy-to-use mapping tools: CartoDB and Google My Maps.

Creating a Personal Website
Build an academic or professional website with WordPress.

Intro to Text Analysis
Get started analyzing a body of text with Voyant.

Cleaning Your Data
Clean up a messy data set using Excel and OpenRefine.

Managing Your Online Identity
Learn how to shape what people see when they Google you.

Using Place-Based Mobile Apps
Create a tour of locations, guided by contextual information.

Visualizing Your Data
See your data in a whole new way with Tableau Public.

Building Online Exhibits
Learn about some popular tools to showcase your digital content.

Intro to Network Analysis
Use Gephi to visualize and graph complex relationships.

Workshops will be held in the ECDS on the 3rd floor of Woodruff Library. For more information and to register, visit ecds.emory.edu.
